Data & Business Analyst with 5+ years in financial services and an MSc in Data-Driven Design (Hogeschool Utrecht, 2026). Skilled in SQL, Python, Power BI, and ETL pipelines; experienced in translating business requirements into analytics solutions, predictive modeling (XGBoost, SVM), and explainability tools (SHAP, DiCE).

PROJECTS – GRADUATION RESEARCH

Explainable AI & Decision Support Systems

Nov 2023 – Mar 2026

HU University of Applied Sciences Utrecht

Architected a 92%-accurate credit risk model (XGBoost, SVM) for loan application underwriting, with SHAP & DiCE explainability and a Streamlit dashboard for business users. Partnered with industry clients to define data requirements; delivered iterative model validation (Accuracy, Precision, Recall, F1) in Agile – balancing performance, fairness, and regulatory transparency.

WORK EXPERIENCE

LTD Amboli • Tbilisi, Georgia

BI Developer

Mar 2023 – Aug 2023

Promoted from Financial Analyst to BI Developer for spearheading the company's shift from Excel to a real-time Power BI environment via MS SQL. Reduced analysis time by 50% and improved reporting accuracy across HR and finance functions. Acted as business analyst liaison, translating stakeholder requirements into scalable data models and cross-functional analytics solutions.

Financial Analyst

Sep 2020 – Mar 2023

Built core financial reports (P&L, CF, SG&A, CAPEX), cutting reporting time by 30% and informing investment decisions that resulted in 5 new branch openings. Streamlined cross-team data flows and service reporting, reducing manual handling by 25%.

LLC ALDAGI • Tbilisi, Georgia

Property & Agro Claims Manager

Jul 2017 – Sep 2020

Produced quarterly performance reports and executive presentations for the director and CEO-level decision-making, improving claims processing efficiency by 20%. Partnered with underwriting and IT to translate requirements into streamlined workflows, reducing issue resolution time by 30%.
